

Dragon Hatchling

Baby dragons are known for being extremely cute, but that appearance is deceptive. Their teeth and magical powers are already present and they have voracious appetites. To be sure, they are weaker than their adult counterparts, but it is likely that a hatchling's parents are nearby, providing expert protection if necessary. The shell is a big part of this origami version, as are the awkwardly-formed features, giving this dragon an adorable appearance.

COMPLEX LEVEL

11 Turn the paper over.

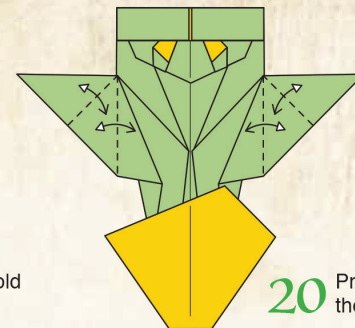

12 Pull out the trapped layers and flatten.

13 Mountain fold the sides behind, so the edges meet at the center.

19 Mountain fold the corner.

20 Precrease the flaps.

14 Valley fold the top section down.

15 Mountain fold the bottom edges behind.

16 Valley fold the sides to the center.

21 Pleat the flaps inward.

22 Form a tiny pleat, allowing the head to become convex.

23 Mountain fold the edges behind.

17 Valley fold the flaps outward.

18 Mountain fold the hidden edges.

24 Open out the wings and round out the body and shell.

25 The completed Dragon Hatching.
